# Publication of Psychological Abstracts to Cease with December 2006 Issue

As use of electronic databases has expanded, subscriptions to the print index have declined to a point where it is no longer feasible to publish a print edition. Consequently, after 80 years of publication, *Psychological Abstracts* will end with Volume 93, No. 12 in December 2006. We believe we can better serve subscribers in other ways. The American Psychological Association also produces PsycINFO; this electronic database includes nearly 2.3 million records dating from the early 1800s. Whereas page limitations precluded rapid growth in *Psychological Abstracts*, the database is now growing very rapidly; 116,000 records were added in 2005. APA offers site licenses to institutions (see [www.apa.org/psycinfo](http://www.apa.org/psycinfo)) and economic electronic packages to members (see [www.apa.org/access](http://www.apa.org/access)) and nonmembers (see [www.apa.org/gold](http://www.apa.org/gold)).

PsycINFO, a family of interrelated information services, provides access to the literature in psychology and related behavioral and social sciences in a variety of ways. PsycINFO consists of

**Psychological Abstracts (PA)** journal (ISSN 0033-2887). The comprehensive monthly compilation of nonevaluative summaries of the serial and book literature in psychology and related disciplines.

**Issue.** The monthly PA issues contain entries listed under 22 major classification categories, with some categories having subsections, as shown in the Table of Contents. Under each classification heading, the records are arranged alphabetically by first author, and are numbered consecutively each year.

**Indexes.** An author, brief subject, and book title index appear in each monthly issue. An expanded and integrated annual index is published at the end of each volume.

**PsycSCAN®: Clinical Psychology.** A quarterly print publication and electronic subset of the PsycINFO database containing abstracts from subscriber-selected journals in clinical psychology.

**Neuropsychology Abstracts.** Formerly known as *PsycSCAN: Neuropsychology*. A quarterly print publication and electronic subset of the PsycINFO database covering clinical and human cognitive experimental areas of neuropsychology.

**Psychoanalytic Abstracts.** Formerly known as *PsycSCAN: Psychoanalysis*. A quarterly print publication and electronic subset of the PsycINFO database containing abstracts of psychoanalytic content.

**The Thesaurus of Psychological Index Terms® 9th Edition (2001).** A compilation of the controlled vocabulary used when creating records for PsycINFO databases.

**PsycSCAN®: Applied Psychology.** An electronic-only subset of the PsycINFO database that contains abstracts from subscriber-selected journals related to applied psychology.

**PsycSCAN®: Behavior Analysis & Therapy.** An electronic-only subset of the PsycINFO database that contains abstracts of content covering behavior analysis and therapy.

**PsycSCAN®: Developmental Psychology.** An electronic-only subset of the PsycINFO database that contains abstracts from subscriber-selected journals in developmental psychology.

**PsycSCAN®: LD/MR.** An electronic-only subset of the PsycINFO database containing abstracts related to learning and communication disorders and mental retardation covering a wide range of topics, including theories, research, assessment, treatment, rehabilitation, and educational issues.

**PsycSCAN: Psychopharmacology®.** An electronic-only subset of the PsycINFO database with targeted information about clinical and experimental psychopharmacology.

**PsycINFO® Database.** An electronic bibliographic database for professionals in behavioral sciences and mental health. It includes abstracts and citations (not full text) for journals, books, book chapters, and dissertations. Coverage extends from 1842 to present. The database includes material relevant to psychologists and professionals in related fields such as psychiatry, management, business, education, social science, neuroscience, law, medicine, and social work.

**PsycEXTRA,** a companion database to the scholarly PsycINFO, links clinicians, librarians, consumers, policy-makers, and researchers to a variety of credible information sources covering psychology, behavioral science, and health. Documents include newsletters, magazines, newspapers, technical and annual reports, government reports, consumer brochures, and more. PsycEXTRA is different from PsycINFO in its coverage, and also in its format, because it includes abstracts and citations plus full text for a portion of the records.

For more information on the above products and costs, write to [psycinfo@apa.org](mailto:psycinfo@apa.org) or PsycINFO, American Psychological Association, 750 First Street, NE, Washington, DC 20002-4242; or visit the American Psychological Association web site at [www.apa.org](http://www.apa.org).  
**Psychological Abstracts** is printed on acid-free paper. Printed in the U.S.A.

**Psychological Abstracts** (ISSN 0033-2887) is published monthly with an additional mailing for annual indexes by the American Psychological Association. Prices \$1,616 domestic libraries; \$1,697 international libraries; \$1,470 individual non-members; \$962 APA members. Periodicals postage paid at Washington, DC, and additional mailing offices. ## COVERAGE LIST

1. Journal title. Bold type identifies those journals that published articles appearing in this volume year.
2. Publication year of first issue scanned. Asterisks within parentheses indicate that coverage by *Psychological Abstracts* began with the first issue of the publication.
3. Journal ISSN.
4. Journal frequency. The number of issues published per year. "IR" indicates that an irregular number of issues are published.
5. Publisher name.
6. Publisher address.

## AUTHOR INDEX

1. Author. The Author Index is intended to be a name only and not a person index. "Adams, P." will be listed separately from "Adams, Paul" even though the name may refer to the same person; however, two listings for "Adams, P." may refer to two different authors.
2. Abstract referenced.

## BOOK TITLE INDEX

1. Book Title.
2. Abstract referenced.

## 2006 COVERAGE LIST

The PsycINFO Coverage List includes journals and other serial publications that are scanned regularly, abstracted selectively, and included in *Psychological Abstracts (PA)* and the PsycINFO database. In cases where a journal publishes articles only in a language other than English, the abstracts for these journal articles will be included in the PsycINFO database, but will not appear in *Psychological Abstracts*. A dagger (†) after the title indicates this occurrence. For journals that publish articles both in English and in other languages, only the abstracts of the English language articles will be included in *PA* while both English and non-English language articles will appear in the PsycINFO database.

The presence of a serial title in the list does not imply that all articles contained in issues of that serial will subsequently appear in PsycINFO's database or print products. Journals likely to publish articles relevant to behavior are included for regular systematic scan of their content. Articles are selected specifically and individually for their relevance to psychology.

Whenever possible, publisher name, address, frequency of publication, and ISSN are included for each publication to facilitate access to original documents by users. The date in parenthesis indicates the publication year of the first issue scanned by PsycINFO of a particular serial. Asterisks within parenthesis indicate that coverage began with the first issue of publication. An N/A after an ISSN indicates that the number was not available. Bold type identifies those journals that published articles appearing in this volume year.

This Annual Author Index contains over 100,000 references to the authors and editors of approximately 40,000 abstract records published in the 12 monthly issues of *Psychological Abstracts* from January 2006 through December 2006. A companion work, the Annual Subject Index, references these records by topics.

In this volume, all the authors and editors whose work was abstracted or cited in *Psychological Abstracts* for the periods indicated are listed alphabetically by surname. However, the Author Index is intended to be a name index only and not a person index. "Adams, P." will be listed separately from "Adams, Paul," even though the names may refer to the same person. Two listings for "Adams, P." may also refer to two different authors. Entries consist of author name(s) and the *Psychological Abstracts* abstract number under which the entry appeared.

# INSIGHT IN PSYCHOTHERAPY

Edited by Louis G. Castonguay and Clara E. Hill

Insight, or the acquisition of a new understanding, is recognized as an important vehicle of change across a variety of theoretical approaches in psychotherapy. While it has been associated with psychotherapy for much of the past century, insight is not clearly understood. The distinguished contributors to this book delineate and integrate what is currently known about insight, and discusses new directions that could help clinicians and researchers better understand this rich and complex process. At a theoretical level, the individual chapters cover insight from psychodynamic, humanistic-experiential, cognitive-behavioral, family therapy, and integrative perspectives. A review of empirical literature is included, as well as a number of studies (involving quantitative and qualitative analyses) on insight. In addition, the book addresses important clinical issues, such as the link between insight and action, and the role of therapist and client in fostering insight. Other chapters examine how social psychology, cognitive psychology, developmental psychology, and philosophy can enhance our understanding of insight. The final chapter integrates the perspectives of prominent psychotherapy researchers on four central questions: What is insight? What facilitates it? What are its consequences? What remains to be known about it? 2007. 488 pages. Hardcover.

# EDUCATING THE HUMAN BRAIN

**Michael I. Posner and Mary K. Rothbart**

**E**ducating the Human Brain is the product of a quarter century of research. This book provides an empirical account of the early development of attention and self regulation in infants and young children. It examines the brain areas involved in regulatory networks, their connectivity, and how their development is influenced by genes and experience. Relying on the latest techniques in cognitive and temperament measurement, neuroimaging, and molecular genetics, the book integrates research on neural networks common to all of us with studies of individual differences.

In this book, the authors explain where, when, and how the brain performs functions that are necessary for learning. Such functions include attending to information; controlling attention through effort; regulating the interplay of emotion with cognition; and coding, organizing, and retrieving information. The authors suggest how these aspects of brain development can support school readiness, literacy, numeracy, and expertise. The audience for this book includes neuroscientists as well as developmental and educational psychologists who have interest in the latest brain research. The many helpful visuals—including brain diagrams, pictures and photographs of experimental set-ups, and graphs and tables displaying key data—also give this book appeal for graduate students. 2007. 272 pages. Hardcover.

# Psychological Treatment of Obsessive-Compulsive Disorder

## FUNDAMENTALS AND BEYOND

Edited by Martin M. Antony, Christine Purdon,  
and Laura J. Summerfeldt

AMERICAN  
PSYCHOLOGICAL  
ASSOCIATION

**H**istorically, psychologists have considered obsessive-compulsive disorder (OCD) a challenging disorder to treat, with significant numbers of patients failing to benefit from treatment. The heterogeneity of the population and the complexity of the disorder have been contributing factors. However, cognitive-behavioral treatments are showing great promise, particularly when delivered with pharmacotherapy and tailored to the unique characteristics of each OCD subtype.

The chapters in this volume, written by prominent specialists, provide practical, step-by-step descriptions of psychological approaches to treating OCD. After explicating the general, underlying features of the disorder, the contributors to this volume describe evidence-based behavioral and cognitive approaches, such as exposure and ritual prevention and cognitive restructuring. Subsequent chapters discuss how to apply these strategies with particular presentations of OCD, including fears of contamination; doubting and checking; incompleteness concerns; religious, sexual, and aggressive obsessions; and compulsive hoarding.

Practitioners experienced in treating this disorder will appreciate the discussion of more advanced issues, including dealing with treatment resistance and comorbidity and treating OCD in special populations. All readers will find in this book a practical and insightful guide for helping individuals with this troubling disorder.

# Disorders of the Self

## A PERSONALITY-GUIDED APPROACH

**Marshall L. Silverstein**

In this thought-provoking book, Marshall L. Silverstein applies a self psychological viewpoint, as formulated and broadened by Kohut, to understanding the personality disorders designated on Axis II of the *DSM-IV*. He recasts the disorders as disorders of the self, grouping them into one of three patterns: those that center on (1) combating devitalization, (2) forestalling fragmentation, or (3) seeking alternative pathways to a cohesive self. For each group, he outlines the descriptive psychopathology and main theoretical viewpoints and then presents a self psychological reformulation of how the behavior and symptom patterns represent deficits in self-cohesion.

Silverstein considers three disturbances presently not classified as personality disorders in the *DSM-IV* nomenclature, one of which, depressive personality disorder, is under consideration for future inclusion. The others are consistent with the general definition of personality disorder as a pattern of deviant inner experience and behavior that is enduring, inflexible, and pervasive and that produces clinical impairment (i.e., harmful dysfunction). All are amenable to explanation from a self psychological framework, the author observes, and notes that self psychologists have considerable experience working with such disturbances.

This thoughtfully prepared volume, the first to systematically apply this theoretical framework to this broad group of disorders, offers readers fascinating and valuable insights into how undermined self-cohesion compromises patients' functioning in their daily lives. 2007. 320 pages. Hardcover.

# SENSATION SEEKING AND RISKY BEHAVIOR

**Marvin Zuckerman**

**R**isky behavior can be an expression of a normal, genetically influenced personality trait, sensation seeking. Its expression in risky behaviors such as extreme and risky sports, vocations, substance abuse, unsafe sex, and crime, among others, is the topic of this fascinating and accessible book. In *Sensation Seeking and Risky Behavior*, Marvin Zuckerman offers a comprehensive view of the role of sensation seeking in a wide range of behaviors, from risky driving and sports through substance use, sex, and crime or other antisocial behaviors. How the personality trait sensation seeking relates to these risky behaviors is described and explained in terms of genetics, biology, attitudes, and expectancies. Insights into prevention and treatment of maladaptive forms of sensation seeking, like substance abuse and unsafe sexual activity, based on the published research, are offered. The author of this engagingly written book is one of the foremost experts in this important area of behavior. 2007. 320 pages. Hardcover.

# Emotions and Culpability

*How the Law Is at Odds With Psychology, Jurors, and Itself*

Norman J. Finkel and W. Gerrod Parrott

**T**his book investigates why, when, and how ordinary human beings hold some individuals guilty of crimes, but others less so or not at all. Why, for example, do the emotions of the accused sometimes aggravate a murder, making it a heinous crime, whereas other emotions might mitigate that murder to manslaughter, excuse a killing ("by reason of insanity"), or even justify it ("by reason of self-defense")? And what emotions on the part of jurors come into play as they arrive at their decisions?

The authors argue persuasively that U.S. law is out of touch with the way that jurors' "common sense justice" works and the way they judge culpability. This disconnect has resulted in some inconsistent verdicts across different types of cases and thus has serious implications for whether the law will be respected and obeyed.

Problems arise because criminal law has no unified theory of emotion and culpability, and legal scholars often seem to misunderstand or ignore what psychologists know about emotion. The authors skillfully show that the law's culpability theories are (and must be) psychological at heart, and they propose ways in which psychology can help inform and support the law. Throughout, the authors deftly weave examples from real-life high profile cases such as those of John Lee Malmo, Andrea Yates, and Bernard Goetz, as well as—unexpectedly—illuminating examples from the psychologically sophisticated tragedies of Shakespeare.
